SAMPA AIR SPRING LIMITED WARRANTY

Sampa's air-springs are warranted to be free of defects or workmanship, and are designed to provide trouble-free on-the-road service (regular applications vehicles) for up to 3 years or 300,000 miles (whichever comes first). For specialty and vocational vehicles, the warranty is of 1 year / 100,000 miles. For both cases, warranty is provided when the vehicle is operated within the limits determined by its manufacturer, the airsprings are properly installed by a licensed professional, and the remaining components of the suspension system are functioning correctly. This warranty begins on the date the product has been delivered. This limited warranty does not include the cost of labor and/or other components related to the replacement of the defective air spring. This warranty will not cover failures due to mis-installation, vehicle abuse or overload, excessive or insufficient pressure during vehicle operation.
